One license covers use of the software on one field computer (data acquisition program) and on two PC computers for data processing.

Archer, Allegro, and other Windows Mobile based software is supplied with a Software Key based on the field computer serial number, Windows 2000/XP/7 data acquisition software is supplied with USB dongle (does not affect computer during actual data recording).

Each TrackMaker, RTmap or Multi software package includes data acquisition and data processing programs, two manuals in pdf format (one for field data acquisition and one for the data processing program), and free updates for a period of one year.

Technical support from Geomar is free during the first year after the purchase of the software or its update, and as prompt as possible. We always try our best, however due to technological changes or required additional hardware support we may not be able to help clients using program versions older than one year.

We accept Visa, MasterCard, Bank Transfers, as well as US and Canadian company checks.
